

# Rollout of Off Campus Access of Digital Library Resources through INFED/INFLIBNET Virtual Hosting on Cloud

Team Library in its continuous endeavor to strengthen Research, Innovation and Development at CUHP is pleased to announce the rollout of its another Digital initiative, Remote ACCESS Mechanism (INFED) for Digital Library application ((<https://idp.cuhimachal.ac.in/>))

The remote access mechanism / Off Campus Access, has been facilitated by Virtual Hosting of Machine on Cloud by INFLIBNET, an Inter-University Centre of UGC. INFED is a Shibboleth based Identity Provider (IdP) an initiative towards standard-based open source software applications for authenticating authorized users from institutions and providing seamless access to digital resources from anywhere, anytime within a federated single sign-on framework.

In the first phase all the Faculty and Staff user accounts are being activated, followed by the Students and Researchers. Team INFED is going to send Welcome Email to all the above mentioned users with login credentials and password for remote access. You are requested to please check your official domain based email box ([@hpcu.ac.in](mailto:@hpcu.ac.in)) and follow the steps for account activation.

We look forward to your valuable feedback and for access related assistance, Information Scientist can be reached at [suket.arora@hpcu.ac.in](mailto:suket.arora@hpcu.ac.in) or [library@hpcu.ac.in](mailto:library@hpcu.ac.in)
